MISSION OF HOPE, HAITI
TRANSITION HOME EXPANSION

MISSION
To cultivate a generation of young adults who are faithfully serving God and advancing the vision of Mission of Hope (MOH), as they live out the transforming power of Christ in their personal lives, their families, their work and their community.

PROBLEM
While there is an abundance of orphanages in Haiti, there is a profound and growing need for transition programs to help kids successfully move from an orphanage into community as responsible and functional adults. Because the government age limitation is 18, the majority of kids will not have finished high school by the time they are forced to age-out of an orphanage. This creates a significant problem, as kids are unable to finish school, transition to marketable jobs, and ultimately tends to set them on a path of poverty.

SOLUTION
While a function of this program is to provide young men and women a stable and structured living environment in the critical years from 18-25, we also take full responsibility for spiritually discipling and investing in them as leaders, with a desire to see life transformation for every man, woman, and child in Haiti. The goal remains simple; to prepare these young men and women for life as mature believers in Christ, equipped for good works of service and a vision for their country. Through one-on-one discipleship, individualized development plans, continued education opportunities and a new level of responsibility and independence, we will prepare these young adults for life after the orphanage. Ultimately, they will move on to lead their own homes, provide for their families, and make disciples in their own communities, as they are equipped to pursue the vision God has for them in seeing Haiti won for Christ.

Currently, our facilities include a kitchen, 8 resident homes, one parent house and perimeter walls with independent access to Route 1. As more of our children age out of the Village of Hope, there is a need to expand the Transition Home. We have run out of space for the girls and need to build one more unit.
PROJECT UPDATE

PHASE

Initial Construction: 8 resident homes, additional bedrooms, kitchen and cafeteria
Expansion: Construction of one more unit

STATUS

COMPLETE
FUNDRAISING

TOTAL NEED

$20,000
