OUR VISION

As an organization following Jesus Christ, Mission of Hope exists to bring life transformation to every man, woman, and child in Haiti.
I’ve been traveling to MOH for over 15 years. From their humble beginnings to where they are now can only be attributed to God’s favor and blessing. MOH is bringing life transformation to every man, woman, and child they encounter. Their impact on the nation of Haiti is unprecedented, and God is continuing to expand their influence. I believe everyone needs to go to Haiti and see what MOH is doing firsthand. It changed my life, and I believe it will change yours too.

Campus Pastor
Church on the Rock North
Lubbock, TX
CORE VALUES

Relational Proclamation
Intentionally modeling Christ’s love through relationships

Gospel Saturation
Repeatedly sharing the gospel message in targeted locations

Indigenous Mobilization
Strategically developing national leaders to carry the vision to the nation

Holistic Transformation
Continuously pursuing God’s physical, mental, social, and spiritual destiny for every man, woman, and child

Excellent Implementation
Responsibly utilizing all resources and talents to their fullest potential for God’s glory
HEALTHY CHURCHES
4,731 Children participated in Vacation Bible School (VBS)
4,116 Church Advancement projects completed
2,181 Made professions of faith in Jesus
500+ HaitiOne and nutrition partners
420+ Pastors trained in Bible Leadership class each month
25 Village Champions trained
17 Villages served

HEALTHY ECONOMY
1,000s of artisans selling goods through hope.market
800+ Haitians employed by Mission of Hope
470 Farmers given seeds
270+ Farmers trained
268 Technical School students
30 Business owners graduated from the Business Mentoring Program

HEALTHY SCHOOLS
129,000+ Students impacted through education and nutrition
91,000+ Nutritious meals served daily to students
769 Schools supported
138 Haitian teachers, administrators, and staff trained
45 Students enrolled in the Master of Education Program
38 Schools use Mwen Kapab Christ-centered curriculum
38 Transition House students
24 Students in the Village of Hope orphanage
18 Village of Hope graduates attended university

HEALTHY PEOPLE
151,500+ Individuals received medical care
83,870 Served through the community health program
29,970 Served through the Hospital of Fermathe
20,974 Primary Care patients served at the Clinic of Hope
19,030 Mobile Clinic patients served
7,673 Children given immunizations
1,684 Dental patients served
1,087 Homes built since the 2010 earthquake
996 Vision patients served
723 Served through Medical Outreach Program
496 Mobile Dental patients served
452 Prosthetics patients served
365 Filter of Hope water filters distributed
200 Women screened for cervical cancer
16 Grace House elderly residents

TOTAL SALVATIONS: 2,181
TOTAL LIVES IMPACTED: 460,000
KAREN AND LOLO

When twins Karen and Lolo were brought to Mission of Hope in 2014, they weighed a mere nine and 11 pounds. They were almost three years old. They were frail, lethargic, underdeveloped, and severely malnourished. Karen and Lolo fought hard for their health at the malnutrition clinic—even when their bellies would hurt from finally having quality nutrition in their system. After returning home from the malnutrition clinic, they became a part of the Mission of Hope Medical Outreach Program (MOPs). Our team would see them weekly, but it was evident the girls needed more care than they were receiving at the time. In 2017, they joined our Village of Hope family for a season until they were nursed back to health. They are a tangible representation of true life transformation.

MADAME CASSEUS

Madame Casseus Dieulifort is from the village of Turpin. She received seeds from her local pastor through the Mission of Hope Seeds Program. Pastor Elisson prayed over her land, and she had a good harvest. After tithing her profits, she was able to buy a goat and a piglet. She now has five goats, and the pig had piglets! God turned a simple packet of seeds into a small family business, which enables her to pay for her kids’ school. Madame Casseus was not a Christ follower, but thanks to her participation in the Bible devotions shared during the seed program training sessions, she decided to give her heart to Jesus and is now a member of Pastor Elisson’s church.

HUGENS

Hugens is a Village Champion for Mission of Hope in the village of Fovo. He is responsible for seeing the needs in his village and communicating them back to Mission of Hope so those needs can be met. Fovo is a farming village with many challenges, both physically and spiritually. “Many people live in tents and mud houses that get wet when it rains, so we started building new homes. When they get these new homes, that means a lot to them, and they thank God.” The villagers also cannot afford medical care. Mission of Hope now sends mobile clinics to Fovo. “One of the most exciting things,” says Hugens, “is we built a brand new church where people can worship, come to know Christ, and children can go to school.”
We believe life transformation through Jesus Christ will be accomplished by working in and through the local church to build healthy villages throughout Haiti. The marks of healthy villages include healthy churches, healthy people, a healthy economy, and healthy schools. By working with partners to achieve these benchmarks, we believe God will change a nation village by village, one life at a time.
HEALTHY CHURCHES

- Sharing the Gospel
- Making Disciples
- Meeting Needs
- Pastoral Training

PASTOR EMMANUEL
Pastor Emmanuel and his family had been living in a very bad situation. Their home, like many in the village of Mesaye, was not a healthy or secure place to live. When a North American team from Mission of Hope partnered with his church to build a home in Mesaye, he had the opportunity to receive this new home for his family, but he chose instead to give it to a woman in his village named Marie.

“I saw her house was very bad,” says Pastor Emmanuel. “When it rained, the rain would get in her home, and she would get sick. I knew she needed the house more than me.” After experiencing Pastor Emmanuel’s sacrificial love, Marie was open to hearing about Christ’s greater sacrifice and is now a Christ-follower and an active member of Pastor Emmanuel’s church.
PASTOR SIRANORD

“A couple of years ago, my wife became pregnant with our first child but then became very sick.” The doctor explained that it was because of the water she was drinking. A few churches partnered with Mission of Hope to install a clean water station in his village of Source Matelas.

“After drinking that water, she went back to the doctor, and the disease was completely stopped. The doctor told me, ‘Even after the baby is born, keep giving her this water.’ That same doctor who saw my wife now comes to buy the same water.” Pastor Siranord loves to go through his village telling people not only about this water but also about the living water found in Jesus Christ.
ROGER
Roger is a coach with the Mission of Hope Business Mentoring program. “I spend my days in the villages training small business owners. Closnik is one of the interns in our mentorship program; he owns a small business in Cabaret. I come here each week to teach him on cash flow and other principles to help his business. He’s always taking notes. He loves to learn.

“When I first met him, he was selling, but his business was not making money. Now his business is making a profit, and it has changed his life. Now he can send his daughter to school. I have trained dozens of business owners like Closnik. We teach them to become business leaders in their church and their community. This partnership is giving Closnik and the other interns the tools to get their families out of poverty.”
“Life growing up wasn’t that easy for me. I always wanted to go to school. I was only five; after doing all the things at the house, I would have to carry this big bucket on my head and then go to the market and sell it.” When Vena’s dad found a job at Mission of Hope, she was able to school. “At the age of 12, I didn’t know how to read or spell my name, or write it down. We were so happy! I was jumping around, ‘Yes, I’m going to school!’” Through Mission of Hope, Vena finished high school, and she also attended university. Now she leads the Hospitality team at Mission of Hope. “For one child to go to school in Haiti, it can transform their life, their family, their village, and bring a change to everybody around them. It did for me.”
MOBILIZATION

WHAT IS MOBILIZATION?

In 2018, 4,224 people served with Mission of Hope on short-term mission trips to meet the physical and spiritual needs of the Haitian people. In the process of serving others in Haiti, they also experienced a personal life change of their own. These individuals brought back the idea of bringing life transformation to every man, woman, and child to their own personal communities and spheres of influence.

Mission of Hope has deeply impacted each and every one of our teams in ways that will last forever. They provide opportunities for us to work—not just for but with—the Haitian people, therefore allowing us to build deeper relationships and friendships. They provide opportunities for us to share the Gospel and to show the love and hope we all have in Christ.

Every year we see tangible improvements in areas such as housing, education, and healthcare. It is obvious the difference MOH is making in Haiti. Thank you, MOH, for transforming our lives in the process.

TEAM HOUSING

Titanyen: Main Campus
Mission of Hope’s main campus is 12 miles from Port au Prince and is home to the Clinic of Hope, Village of Hope orphanage, Church of Hope, School of Hope, Technical School, and other areas of ministry.

Bercy: Coastal Campus
On the coast just north of Titanyen, Bercy is home to the Bercy School, Pastoral Training Center, and Grace House elderly home.

Fermathe: Mountain Campus
Nestled in the lush mountains near the town of Kenscoff, Fermathe is home to the Hospital of Fermathe, Baptist Haiti Mission, Mountain Made retail store, Noah’s Ark playground, and zoo.

Le Phare: Beach Campus
Located 40 miles north of Port au Prince, Le Phare offers beach access, a basketball court, a volleyball court, and hosts over 1,000 Haitian summer camp participants.

True North: Floating Campus
A 110 foot ship has been outfitted to sleep 34 guests. It is used by medical and construction teams to reach people with the gospel and provide much needed care in villages difficult to reach by land.

Turks and Caicos Islands
There is a large Haitian community living in the Turks and Caicos Islands, and our desire is to see this and other underserved communities on the island transformed by the gospel. Despite the reputation as a popular luxury travel destination, there is a vast difference between the experience of a tourist and the daily challenges faced by the immigrant communities who live on the islands.

Dominican Republic
God has opened doors in the northern part of the Dominican Republic to serve a large Haitian population. Working alongside the local churches, trip participants can participate in youth programs, small construction projects, mobile medical clinics, and community evangelism.

SERVICE ACTIVITIES
• Driven by the individual village needs, as discovered and led by Haitian Village Champions
• Service projects
• Strategic Village Time (SVT)
• Vacation Bible Schools (VBS)
• Medical ministry
• Sports camps / clinics

MEDICAL MOBILIZATION
• Mobile Clinics
• Medical Outreach Program
• Primary Care Clinic
• Vision Clinic
• Dental Clinic
• Prosthetic Lab
HOPE.MARKET

JOB CREATION, TRAINING AND DEVELOPMENT, LIFE CHANGE

hope.market exists to inspire and change the lives of people and communities in which we serve and do business by creating jobs and fostering training programs in an environment that promotes freedom in Jesus Christ. 100% of your purchase goes to support artisans in Haiti and the ministries working with them to transform their nation.
Life transformation for every man, woman, and child is at the heart of our vision. Our goal is to bring life transformation to over one million people by 2020. The first step is by sponsoring a student, graduate, or Grace House elderly home resident, which changes one life at a time. You can have an even greater impact by investing in the transformation of a community, a region, or the entire nation by giving to the Hope Fund at one of these Levels of Transformation.
MAKE A DIFFERENCE

SPONSOR A CHILD
Provide a student with a quality, Christ-centered education and a daily nutritious meal. You can choose a boy or girl at the Kindergarten, Primary, or Secondary grade level. With this special one-to-one relationship, you can write and even visit your sponsored child.

SPONSOR A GRADUATE
Help a recent high school graduate achieve his or her dreams by assisting with college, university, or trade school tuition. These recent high school graduates were raised in the Village of Hope orphanage and now live in Mission of Hope’s Transition House.

SPONSOR THE ELDERLY
Provide a safe and clean home, three meals a day, medical care, and ultimately burial and graveside services to some of the most vulnerable and neglected people in Haiti. The Grace House is one of the few elderly care centers in Haiti—a place of hope, dignity, and joy.
MAKE A DIFFERENCE

BECOME A WOMEN’S ADVOCATE

One in three women between the ages of 15-49 is a victim of abuse. Become a Women’s Advocate, and empower women in Haiti to change their story from brokenness to restoration and from shame to redemption.

BECOME A BUSINESS MENTOR

Help business owners in Haiti build profitable businesses that provide for their families and transform their local economies. You can support local business development financially or become a business mentor.

INVEST IN EDUCATION THROUGH LESPWA

Less than six in 100 children in Haiti will complete high school. Lespwa means “hope” in Creole, and you can invest in education through the Lespwa initiative to help bring stability and opportunity, opening doors for innovation and progress.
WHERE YOUR MONEY GOES

HOW WE USE FUNDS RECEIVED TO TRANSFORM LIVES:

- In fiscal year 2018, $0.94 of every dollar given went to support program activities in and for Haiti.
- All of our programs are carefully and consistently monitored to ensure maximum impact for the people of Haiti.

INVESTMENT NEEDED TO IMPACT 300,000 LIVES THIS YEAR:
TOTAL .......................................................... $15,000,000
CURRENT PROJECTS

In addition to our four focus areas, we have many other projects in progress to help bring life transformation to the Haitian people.

BERCY HIGH SCHOOL

Goal: To give students in and around Bercy the opportunity to graduate, making employment and post-secondary education a greater likelihood.

Why: We currently do not have a high school in Bercy. There is a great need for a secondary school, so Bercy students can continue their education.

SPORTS COMPLEX

Goal: To invest in the spiritual, physical, and communitywide transformation of our surrounding villages through the setup and operation of a sports recreation center.

Why: Community residents and particularly adolescents have very few opportunities for highly engaged spiritual discipleship and sports mentoring. There is a crisis of leadership development among young men and women in Haiti.

I believe in Mission of Hope’s initiative completely, and I feel that this sports complex will be an incredible way for the youth of Haiti to have more opportunities to enjoy sporting competition, to further their education, to have access to healthy meals, and to enjoy being around a Christian community to help further their faith.

Philadelphia Eagles Quarterback
**CAMPUS RENOVATIONS**

**Goal:** To improve Mission of Hope’s four campuses in Haiti.

**Why:** Our campuses offer Haitians and North Americans a space for meaningful ministry to take place through mission trips, sports camps, VBS, schools, the Clinic of Hope, the Hospital of Fermathe, the Church of Hope, the Village of Hope orphanage, the Technical School, business mentoring, pastoral training, hope.market artisan retail, office space for our Haitian employees, and other on-campus ministries.

---

**SOLAR PROJECT**

**Goal:** To create a sustainable solution to Mission of Hope’s current and forecasted power needs via solar generation and power storage on its main campus.

**Why:** The costs of operating, maintaining, and fueling power supply through traditional means of diesel generators on the Mission of Hope campus remains costly, unreliable, and requires increasingly expensive investments.

---

**TITANYEN HOUSING PROJECT**

**Goal:** To build 300 houses on two properties in the village of Titanyen.

**Why:** Titanyen—home to 13,000 residents, half of whom are children—is known in Haiti as a village with many challenges. Many people who lost their homes in the 2010 earthquake moved out to Titanyen. Few people have reliable jobs, and most live in makeshift houses that are unsafe and unsanitary.

---

**COMMERCIAL ZONE**

**Goal:** To provide stability and economic growth in the region of Minoterie through a Business Manufacturing Center that creates jobs for at-risk women and others. Employees will receive access to the Child Development Center so that they are able to work while their children are cared for and are hearing the gospel.

**Why:** Unemployment in Minoterie exceeds 77%, and many parents still struggle daily to feed their children, let alone send them to school. At-risk women are particularly in need of employment and need childcare during the day to make working possible.
